HARSH PANCHAL

+91-9714891296 | panchalharsh0508@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Creative UI/UX Designer with a Computer Science Engineering background and experience designing intuitive user interfaces, websites, marketing creatives, and brand identities. Skilled in Figma, Canva, Affinity Suite, Python automation, and AI-powered design workflows.

EDUCATION

B.Tech, Computer Science & Engineering (In Progress)
Gandhinagar Institute of Technology (GIT)
CGPA: 9.13/10 (Year 3), 7.30/10 (Year 2), 7.24/10 (Year 1)

EXPERIENCE

UI/UX Designer (Full-time) | Shreeraj Corporation | Jun 2026 – Present

- Designed responsive websites, landing pages, dashboards, and user interfaces using Figma.
- Created marketing creatives, banners, brochures, and social media assets using Canva.
- Collaborated with developers to ensure pixel-perfect implementation and design consistency.
- Implemented a dynamic, data-driven product catalogue system that automated catalogue creation and reduced manual effort.
- Built an offline, locally run system that converts 3D STEP (CAD) models into 2D engineering drawing files.
- Developed small Python utilities to automate repetitive design and catalogue workflows.
- Used AI tools extensively to accelerate design, research, content generation, and productivity.

Canva Designer & Sales Executive | Techson Industries | Jan 2025 – Nov 2025

- Designed promotional creatives and product marketing material in Canva.
- Managed social media creatives and coordinated design revisions with clients.
- Supported digital marketing campaigns while handling customer communication.

PROJECTS

3D STEP to 2D Engineering Drawing Converter | Python, CAD Automation, Offline Processing

- Developed an offline, locally run Python converter that processes complex assembly-level STEP (.step/.stp) files with 100+ individual parts into 2D engineering drawings for each part.
- Generates an isometric view and three orthographic views (front, top, side) per part with accurate dimensions and measurements.
- Exports drawings in multiple formats, including PDF, DXF, DWG, and PNG.
- Calculates and reports the total material weight required for each part when material data is available in the STEP file.
- In progress: reverse conversion of 2D drawing files into precise 3D STEP models, fully offline.

Catalogue Generator | Python, Excel Automation

- Built a Python automation tool that generates product catalogues from any Excel spreadsheet, including product images loaded from image URLs.
- Outputs catalogues in the desired layout and format, with optional watermarking.

SKILLS

Design: Figma, Canva, Affinity Designer, Photoshop, Illustrator
UI/UX: Wireframing, Prototyping, Design Systems, Responsive Design, User Flows
Development: Python, AI-Assisted Development, Git, GitHub, Excel Automation
CAD & Automation: STEP to 2D Drawing Conversion, DXF, DWG, Orthographic and Isometric Views
AI Tools: ChatGPT, Claude, Claude Code, Gemini, Cursor, AI-assisted design workflows
Marketing: Digital Marketing, Branding, Social Media Design

LANGUAGES

English, Hindi, Gujarati
